

Hackneau Collection

Hackneau Hybrids

1. Rlc Murray Spencer 'Armroy's Dark Star' FCC/AOS x Rlc Fred S. Missbach 'Hackneau' = (Rlc Darci Hackney) – One parent of Murray Spencer is the famous Nigrella and the other a cross of two of the most famous cattleya hybrids ever made, Bonanza and Norman's Bay. It has produced great red flowers before. Here matched with my intensely pigmented purple-red and very flat Fred S. Missbach, I am seeing fragrant, amazingly flat flowers with excellent dark color on large flowers 4" pots \$25
2. Rlc Norman's Bay 'Lucile' FCC/AOS x Rlc Brunswick Gem 'Coral' - Famous clone of Norman's Bay matched with a clear, red Brunswick Gem from Australia. Brunswick Gem has C Horace as a parent and has perfect shape. Expect large, deeply colored flowers with large lip and excellent shape. Near blooming size in 4" pots \$25.
3. Rlc Lenette Splendor 'Que Suerte' x Rlc Brunswick Gem 'Coral' – Lenette Splendor brings rich red color from Lenette Greenhouse breeding combined here with the beautiful Aussie Brunswick Gem. Brunswick Gem is Blc Owen Holmes x Horace, so expect a range of color from red to purple flowers with excellent shape. First to bloom was an excellent large red flower, but expect an array of color with this hybrid. Limited seedlings available, 4" pots \$25.
4. Rlc Mem. Roy Field x Rlc Brunswick Gem 'Coral' – Mem. Roy Field (Goldenzelle x Honolulu Sunset) brings both shape from Goldenzelle and brilliant color, from Honolulu Sunset to the cross. Brunswick Gem (Horace x Owen Holmes) has large red flowers with excellent shape from Horace. Expect fantastic shape and rich color ranging from yellow to red flowers in progeny. 2" pots \$10, 4" \$20.
5. Rlc Darcy-Rose Campbell 'Aloha' x Rlc Midnight Rhapsody 'Hackneau' – 'Aloha' produces intense-yellow flowers with red lip, while Midnight's flowers are deep purple. 'Aloha' can also produce 5 or 6 flowers nicely spaced on a strong stem reminiscent of C warszewiczii in its background. Seedlings have been very vigorous. This type of cross can produce large, brilliant red flowers. 2" pots \$10, 4" pots \$20.
6. Rlc Heather's Gold 'Main Strike' x Rlc Carolina Splendor 'Carolina Flame' – Combining a perfect yellow from EFG with the rich red-purple color of Carolina Splendor. First to bloom was a nice orange color with excellent shape thanks to Goldenzelle in the ancestry. However, seedlings blooming with yellow and red flowers will be found in this hybrid. 4" pots \$25.
7. Rlc Volcano Star 'Volcano Queen' FCC/AOS x Lc Higher Ground 'Hackneau' AM/AOS. Expect 3-4 huge, 6.5 – 7", flowers on an excellent stem thanks to Laelia anceps in Higher Ground's ancestry. Colors will range from crystalline white petals with a colored lip to blush pink flowers with a colored lip. 4" pots \$15.
8. Rlc Mem. Carol Shores (Rlc Pink Empress 'Lakeview' x Rlc Norman's Bay 'Gothic' AM/AOS) – Named for a friend and charter member of the Cape Fear Orchid Society who loved classic cattleyas. 'Gothic' can reach over 7" in natural spread and Pink Empress (Rlc Mt Hood x Rlc Bryce Canyon) is even larger. This cross incorporates

genes from some of the most famous classic Cattleyas into a hybrid that will showcase the beauty of "Classic Cattleyas." 4" pots \$20.

9. C Feuillati (C leopoldii coerulea x C violacea coerulea 'Hackneau') – Another archaic hybrid, first registered in 1897 before aseptic culture was introduced here made with coerulea parents. The first to bloom have not been coerulea, but instead richly tipped color. 4" pots \$20.
10. **[New Release]** C Wenlandianum coerulea (C warsceweczii x bowringiana) 'Liquid Blue' x C violacea coerulea 'Hackneau' – C violacea hybrids are difficult to grow in small pots so this cross was held until they were in 4" pots and growing well. Expecting excellent coerulea color with this hybrid. **Limited availability, one per person.** 4" pots \$25.
11. Rlc Ports of Paradise (2N) 'Emerald Isle' FCC/AOS x Rlc Mem. Gladys Young (4N) 'Hackneau' – Large, good green cattleyas are hard to find. Ports of Paradise is an excellent parent for green Cattleyas. Combining it with my green-chartreuse 4N Gladys Young should produce green-chartreuse flowers with good form. Vigorous seedlings in 4" pots \$20.
12. Rlc Barbara Briggs x Rlc Mem Roselyn Reisman 'Mendenhall' AM/AOS – Expect giant flowers from this cross with good color and form. The Barbara Briggs (Rlc Mem. Crispin Rosales x Rlc Mem. Grant Eichler) was a first bloom seedlings that was 7" in natural spread with excellent shape. Roselyn Reisman is a classic hybrid from the 1960s and proven parent that produces huge dark lavender flowers. Seedlings are very vigorous. 2" pots \$10.
13. C Melody Fair 'Carol' HCC/AOS x self – In my opinion Melody Fair 'Carol' is the best semi-alba clone around. It is a cross of C Horace x Stephen Oliver Fouraker. Most of the original seedlings were well-shaped lavender, but two were pure white with an intensely colored fuchsia lip. A previous selfing of this clone produced only semi-alba clones, some with extraordinary shape better than the parent. 2" pots \$10.
14. C Stephen Oliver Fouraker 'Elmhurst' HCC/AOS x Lc Higher Ground 'Hackneau' AM/AOS. The Classic pod parent was the best of this color form for many years and an excellent parent for semi-alba seedlings and the parent of Rlc Melody Fair. Expect more large flowers in the semi-alba color form. Flowers will be large on nice stems held above foliage with more open form thanks to the L anceps grandparent. This is a fast grower! Plants will be a little taller than the standard Cattleya. 4" pots \$15.
15. C guttata coerulea x Interglossa coerulea 'Hackneau' AM/AOS – The guttata pod parent is heavily spotted indigo. Expect a proportion of progeny to inherit spots from the *amethystoglossa* grandparent on a coerulea background and lip. Should have a high flower count on a nice stem. 2" pots \$15. 4" - \$25
16. C Maria Ozella 'Mendenhall' AM/AOS x Rlc Bryce Canyon 'Splendiferous' AM/AOS – Maria Ozella is one parent of the famous dark Rlc Edisto and Bryce Canyon a proven parent for well-shaped dark flowers, too. Expect brilliant, colored flowers from this cross. This is a parallel cross to Rlc Edisto using Bryce Canyon instead of Oconee. 2" pots \$10.
17. Rlc Heaven's Gate 'Crystelle' FCC/AOS x Rlc Carlos Magdiel '#1' – Heaven's Gate is a Krull-Smith hybrid and was recently upgraded to a much-deserved FCC by the

- AOS. Matched with an amazing hybrid from Stewarts Orchids expect deeply colored red-magenta flowers on an excellent stem. 4" pots \$25.
18. Rlc Margery Kekauoha 'Royalty' x Rlc Chia Lin 'New City' AM/AOS – Royalty is the perfect clonal name for this Mini-Purple cross with velvety, deep purple flowers. Plants are going to be smaller than standard size when mature, likely from its Mini-Purple grandparent. Chia Lin will increase the size of flowers from the smaller, but intensely deep purple 'Royalty.' Flowers should be 4-4 ½" in size. Very Limited, maximum of two per order. 2" pots \$15.
 19. **[New Release]** Rlc Burdekin Storm 'Midnight' x Rlc Jeremy Island 'Carmela' - Combining two dark, most intensely colored Cattleyas you will ever see, will produce more of the same. Very Limited, maximum of one per order 2" pots \$15, 4" pots \$25.
 20. **[New Release]** Rlc Regal Red 'Paradise' x Rlc Carlos Magdiel '#2' – Striking red crossed with the dark magenta Carlos Magdiel will produce a range of colors in progeny, including some yellow clones. This clone of Carlos Magdiel has distinct dark flares. 2" pot \$10.
 21. Rlc Mem. Roy Fields x Rlc Oconee 'Mendenhall' AM/AOS – Mem. Roy Fields is a Goldenzelle hybrid. Combined with the dependable Oconee will generate a range of color in hybrids from yellow to dark purple. Some clones will likely have better shape than Oconee thanks to the C Horace in the background of Mem. Roy Fields. 2" pots \$10.
 22. **Rlc** Mem. Roy Fields x Rlc Raven Rock 'Hackneau' – The 'Hackneau' clone of Raven Rock (Rlc Owen Holmes x Edisto) is a deeply pigmented, brick red flower. Expect colors from orange to red with nice shape. In other hybrids 'Raven Rock' is producing incredibly colored flowers. 2" pots \$10.
 23. Rlc Deesse 'Perfection' x C Schroder's Catt 'Colossus' - Deesse is a Classic hybrid registered in the 1940s by the famous French company Vacherott & Lecoufle and has been used to produce beautiful pink and white hybrids with flowers noted for their large size. 'Colossus' was 7" in natural spread as a 1st bloom seedling. Schroder's Catt is a combination of C schroederae 'SVO' AM/AOS with a large, classic white with a golden lip. Expect large, well-shaped flowers ranging from white to pink that should be very long lasting thanks to the schroederae grandparent. 2" pots \$10.
 24. Rlc George King 'Serendipity' AM/AOS x Rlc DiCiommo's Rainbow 'Waiomao' HCC/AOS – Expect a kaleidoscope of color from this hybrid. Both parents change color during the life of each flower, thanks to yellow pigment developing over varying densities of lavender in petals and sepals. One seedling will not be enough to appreciate this hybrid. Vigorous plants in 4" pots - \$20
 25. C violacea 'Muse' FCC/AOS x C Circle of Life 'Spring Beauty' – C Circle of Life (4N) is a coccinea hybrid crossed with the famous 2N violacea 'Muse'. Violacea tends to be a dominant parent, but the 4N Circle of Life pollen parent will exert more color to flowers in this hybrid. Seedlings appear to be reduced in size, so expecting small;- stature plants. 2" pot \$10.
 26. **[New Release]** Rlc George King 'Southern Cross' x C Gaston Doin 'Red Bone' – Yellow mutant form of George King crossed with an unusual color form of an old primary

hybrid with a vivid red stripe through the length of each petal. Will the stripe come through? **Limited**, 2" pot \$10.

27. **[New Release]** Rlc King Tut (Mem. Mario Lanza x C tenebrosa) 'Hackneau' x Rlc Tamara Morrison (Cornerstone x Raven Rock) 'Ben's Clone' – This cross is a rich mix of dark colored Cattleyas with a dab of Chocolate Drop. I made the King Tut hybrid specifically to cross it with a large, well-shaped, deeply pigmented Cattleya. 2" pot \$10.
28. **[New Release]** Rlc Ronald's Canyon 'Koko Head' AM/AOS x Rlc Pink Empress 'Ju Sen' AM/AOS. - I like Big Flowers and this cross will produce exactly that with the bonus of great color from Bryce Canyon a grandparent for both parents. Ronald's Canyon produces 7" plus flowers and the award description for 'Ju Sen' is over 8" flowers. 2" pots \$10.
29. **[New Release]** C Bonanza 'Valerie' x Rlc Norman's Bay 'Lucille' FCC/AOS. A remake of Rlc Memoria Crispin Rosales first registered in 1959 that combined the two best Cattleyas of the day. Together these two hybrids garnered more awards than any other standard Cattleya of the day. 'Valerie' was a tightly held clone that has a perfect lip that will add to 'Lucille's' great lip. It is unfortunate that almost all the great clones of Bonanza as well as its offspring Mem. Crispin Rosales were lost to virus. Get your own un-virusd clone of this classic Cattleya hybrid. 2" pot \$10.
30. **[New Release]** (Rlc Waikiki Splendor x Rlc George King) x (Rlc Oconee x C bicolor). - Lots of bright color on both sides of this cross. George King adds form and color to its hybrids that is passed on to future generations. The C bicolor bifoliate grandparent should flatten flowers and add vigor to its seedlings. Some of these will have extraordinary shape too. 2" pot \$10.
31. **[New Release]** Rlc Chia Lin 'New City' AM/AOS x Rlc Lucinda S. Seale 'Bloody Hell' – The color of Bloody Hell is "blood red" and the flower itself very flat. There is a photo of it in Orchid Wiz. Expectation is for extraordinary color of flowers. I can't wait to see this cross flower. 2" pot \$15.
32. **[New Release]** Rlc Goldenzelle 'Sandra' AM/HOS x C Melody Fair 'Carol' HCC/AOS – One of the best yellow Cattleya hybrids crossed with one of the best semi-alba hybrids. With C Horace as a parent of both parents, great shape is guaranteed, but what color. Get a seedling and find out! 2" pot \$10.
33. Rlc Darcy-Rose Campbell 'Paradise' x Rlc Heather's Gold 'Main Strike' – Two excellent yellow parents, both with Goldenzelle as parents. These will be yellow with great shape. 2" pot \$10.
34. C Melody Fair 'Carol' HCC/AOS x C Mishima Flash – The cross will produce excellent white flowers with intense fuchsia-colored lips. Mishima Flash was named by a nursery in Japan with few seedlings leaving Japan. I made the same cross using the exact same parents. Mishima Flash has better color on the lip than Melody Fair, but great shape two. Every seedling should be excellent white with colored lips. 2" pots \$10.
